

# NIT-K to offer online MTech in Signal Processing and AI

**The Hindu Bureau**

MANGALURU

The National Institute of Technology Karnataka (NIT-K), Surathkal, is set to launch an online MTech Programme in Signal Processing and Artificial Intelligence (AI) from the academic year 2026-27.

Interested candidates can visit the NIT-K website

for updates on eligibility criteria, application timelines, and programme details for admission.

The programme is being offered as a result of the institute signing a bipartite Memorandum of Understanding (MoU) with the National Skill Development Corporation (NSDC), and a tripartite MoU with NSDC and the EdTech company

USDC on Thursday.

The collaboration aims to expand access to high-quality online certification and postgraduate programmes, enabling a wider community of learners, including students, working professionals, and entrepreneurs, to benefit from the institute's academic expertise, a NIT-K release said on Saturday.
