

# Weeklong workshop for students at NIT-K

**The Hindu Bureau**  
MANGALURU

A weeklong workshop for students on 'micro controller for the implementation of power electronic converters in renewable energy systems' began at the National Institute of

Technology - Karnataka here on Wednesday.

Sponsored by the Union government under Accelerate Vigyan - Karyasahala Scheme, it is offered by the Science and Engineering Research Board (SERB) to encourage Research and Development activities in

the country by grooming the potential research skills of postgraduate students in selected areas.

The workshop aims to impart knowledge to the participants on various modern power electronics convertor systems, covering topics such as DSP Mi-

crocontroller for the implementation of power electronics converters for renewable energy systems.

Dattatraya N. Gaonkar, Head, Department of Electrical and Electronics Engineering, NIT-K, said 25 students were selected for the workshop.
